Profile

Hi, I'm Ali, a software engineer based in Tallinn. I've been in the software academic and working environment for **9 years**. I studied Computer Science as my bachelor's and MBA with a focus on Software Project management as my master's while working as a software engineer. It's been almost four years that I've been working as a web developer in different roles, including Freelance web developer, Front-end, Full-stack, and Software development team lead.
